

Friday Report – overview and contents

The pages in The Friday Report are about adult offenders in Georgia's prisons and jails. They contain statistical snapshots and trends in the populations and movements of offenders in the state prison system, on probation, on parole, and in local jails. Information comes from databases of the Georgia Department of Corrections (GDC) and the Board of Pardons and Paroles, and from data provided by local jailers. Information is summarized into tables in the GDC/Parole Data Warehouse, and is extracted into these pages each Friday. Pages are organized according to the table that supplied the data.

The Monthly Research Table, named "MO_RESRCH" or simply "MO", contains data about state prisoners, grouped into statistically interesting categories. The table contains one record per month, from January 2000 to the present. Despite its being "monthly", it is updated weekly, because some data trickles in for several weeks before it becomes stable history.	
Page	Contents
MO-01	Clemencies and maxouts. Monthly graph from 2000 to present shows the monthly departures from prison via actions by the Georgia Parole Board (clemencies), and via service of 100% of the court ordered sentence (maxouts)
MO-02	48 months of releases. Table shows counts and percentages of releases via clemencies and maxouts, with and without probation to follow, for each of the past 48 months.
MO-03	Methamphetamine. Monthly graph from 2000 to present shows admissions, departures, population, and percent of population of inmates with a current offense of methamphetamine possession, sale, manufacturing, or trafficking, and the changing racial composition of the methamphetamine population.
MO-04	Non-violent first incarcerants. Monthly graph from 2000 to present shows admissions, departures, population, and percent of population of inmates without violent or sex crimes, who are serving their first Georgia felony incarceration.
MO-05	Seven Deadly Sins. Monthly graph from 2000 to present shows admissions, departures, population, and percent of population of inmates convicted of kidnapping, armed robbery, rape, aggravated sodomy, aggravated sexual battery, and aggravated child molestation, for whom especially severe penalties are prescribed.
MO-06	48 months of inmate subpopulations. Table shows number and percentage of white and non-white inmates with methamphetamine offenses, and non-violent first incarcerants, and inmates convicted of the Seven Deadly Sins.
MO-07	Inmate age overview. Line graph shows the average age of the inmate population, by month from 2000 to the present. Pie chart shows the number of currently active inmates in their teens, twenties, thirties, forties, fifties, and age sixty+.
MO-08	Counts by age group. Graphs show the count, by month from 2000 to the present, of inmates in their teens, twenties, thirties, forties, fifties, and age sixty+.
MO-09	Percentages by age group. Graphs show the <i>percentages</i> , by month from 2000 to the present, of inmates in their teens, twenties, thirties, forties, fifties, and age sixty+.
MO-10	48 months of inmate ages. Table shows average age of the standing population, and counts and percentages of teens, twenties, thirties, forties, fifties, and sixty+, for each of the past 48 months.

Friday Report – overview and contents (*continued*)

The MSR Table is based on the Management Summary Report (MSR), a snapshot report posted each week in GDC's Scribe database. MSR_RESRCH gathers that data into weekly trends, with one record for each Friday since March 20th, 2009.	
Page	Contents
MSR-01	All housed offenders. Weekly graph from March 20, 2009 to present, showing counts of inmates in state prisons, transitional centers, county prisons, private prisons, inmate boot camps, parole revocation centers, probation Residential Substance Abuse Treatment (RSAT), probation boot camps, probation detention centers, plus the inmate jail backlog and probationers in jail waiting for state facilities.
MSR-02	Probationers in jail. Weekly graph from March 20, 2009 to present, showing counts of probationers in local jails awaiting placement in probation detention centers, probation RSAT centers, and probation boot camps.
MSR-03	State inmates in jail. Weekly graph from March 20, 2009 to present, showing counts of state inmates in local jails awaiting placement in state prison facilities – including those who have not yet been assigned to a diagnostic center, those whose transportation has been delayed for some reason, and those who are ready to be picked up.
MSR-04	Female state inmates in jail. Weekly graph from March 20, 2009 to present, showing counts of female state inmates awaiting placement in a state prison for females.
MSR-05	52-week table: housed offenders. Data for each of the past 52 weeks, showing total prison inmates, parolees in revocation centers, probationers in RSAT/boot camp/detention centers, inmate jail backlog, probationers in jail waiting for facilities, with subtotals.
MSR-06	52-week table: state prisoners. Data for each of the past 52 weeks, showing inmates in state prisons, transition centers, county prisons, pre-release centers, private prisons, and inmate boot camps, with subtotals.
MSR-07	52-week table: waiting in jail. Data for each of the past 52 weeks, showing probationers waiting for detention centers, RSAT, and boot camp; and state prisoners not yet assigned to diagnostic centers, in admission process, with delayed transport, and ready for pickup, with subtotals.

The DCA table consists mainly of data submitted from each of Georgia's 140+ local jails, via the Georgia Crime Information Center (GCIC) to the Georgia Department of Community Affairs (DCA), which publishes its <u>County Jail Inmate Population Report</u> on its web site each month. GDC has collected summary statewide data from this report every month since its inception in January, 1993. The table also contains the inmate jail backlog as computed by GDC for the last Friday of each month, for comparison with the jailers' count of state inmates. Although nominally a monthly table, DCA_RESRCH is updated weekly to insure that the DCA data is correctly synchronized with the GDC jail backlog data.	
Page	Contents
DCA-01	Jail composition. Monthly graph from 1993 to the present shows trends in the numbers of unsentenced inmates, state inmates, county inmates, and other inmates.
DCA-02	Two views of jail backlog. Monthly graph from 1993 to present compares jailers' count of "state inmates" with GDC's count of the "inmate jail backlog", and explains that both are valid counts of different phenomena.
DCA-03	48-month table: local jails. Data from Georgia jailers for each of the past 48 months, showing total jail population, capacity, utilization, and number and percent of unsentenced inmates, state inmates, county inmates, and other inmates.

Releases by clemency and maxout, Jan-2000 to Sep-2020

There are two main ways of being released from a Georgia prison -- by actions of the Board of Pardons and Paroles ("Clemencies") and by service of 100% of the court-ordered sentences ("Maxouts"). "Clemency" includes paroles, reprieves, commutations, and transfer to other confinement prior to expiration of sentence.

"Other Releases" includes deaths, and sentences modified or overturned by the courts. Clemencies and maxouts may or may not be followed by periods of probation.

A. Clemency with probation to follow	RISES BY	8	from	685	to	693
B. Clemency only	falls by	10	from	134	to	124
C. Maxout with probation to follow	falls by	65	from	513	to	448
D. Maxout only (unsupervised)	RISES BY	10	from	58	to	68
E. Other releases	falls by	1	from	34	to	33
F. Total releases (A+B+C+D+E)	falls by	58	from	1424	to	1366
G. Total clemencies (A+B) (top line)	falls by	2	from	819	to	817
H. Total maxouts(C+D) (bottom line)	falls by	55	from	571	to	516
I. % of releases by clemency (G/F)	RISES BY	2.3%	from	57.51%	to	59.81%
J. % of releases by maxout (H/F)	falls by	%	from	%	to	%
K. Supervised releases (A+B+C)	falls by	67	from	1332	to	1265
L. % unsupervised releases (D/F)	RISES BY	.91%	from	4.07%	to	4.98%
M. % supervised releases (K/F)	falls by	.93%	from	93.54%	to	92.61%

Monthly releases from prison by type of release, for the past 48 months

Inmates with meth crimes, by month, Jan-2000 to Sep-2020

Methamphetamine is one of the most addictive drugs ever known. At first it induces intense euphoria, but with continued use causes severe depression and physical deterioration, including the dental catastrophe known as "meth mouth".

Georgia's meth epidemic peaked in 2007-2008, then declined, but is again growing. It started in the predominantly white northern counties, with blacks accounting for only about 5% of convictions. But black usage has expanded, and now accounts for about 15% of convictions.

Methamphetamine admissions

RISE BY 73 from 156 to 229

Methamphetamine releases

fall by 2 from 312 to 310

Methamphetamine population

falls by 81 from 6265 to 6184

Meth white population

RISES BY 1 from 4796 to 4797

Meth non-white population

falls by 17 from 1469 to 1452

Percent meth inmates who are non-white

RISES BY .03 % from 23.45% to 23.48%

Non-violent first-incarcerants, by month, Jan-2000 to Sep-2020

Historically, about one in six Georgia prison inmates has been a first-time incarcerant with a non-violent crime. In 2012 Georgia passed HB1176, which aimed to curb the growth of prison population by steering the least dangerous, least hardened offenders away from prison through pre-trial intervention, diversion, drug courts and treatment programs, and raising the dollar thresholds that define property felonies. The expectation is that over time, these measures will reduce the percentage of first-time non-violent incarcerants in prison.

Non-viol/1st-Incar admissions	RISE BY	59	from	142	to	201
Non-viol/1st-Incar releases	fall by	20	from	344	to	324
Non-viol/1st-Incar population	falls by	123	from	5436	to	5313
Non-viol/1st-Incar % of total population	falls by	.11 %	from	11.14%	to	11.03%

"Seven Deadly Sins" by month, Jan-2000 to Sep-2020

Tough legislation in 1995 imposed mandatory ten-year minimum terms for kidnapping, armed robbery, rape, aggravated sodomy, aggravated sexual battery, and aggravated child molestation, and a minimum of 25 years for murder. A second conviction resulted in life without parole. As predicted, longer prison terms caused population to climb steeply for about a decade. It then began to level off, as releases started catching up with admissions. The 2008 dip in percentage of total population (bottom right) was caused by the surge of methamphetamine convictions (Page MO-03). Note: these graphs include inmates convicted before 1995.

"Seven Deadly Sin" admissions	fall by	5	from	25	to	20
"Seven Deadly Sin" releases	RISE BY	17	from	115	to	132
"Seven Deadly Sin" population	falls by	112	from	17422	to	17310
"Seven Deadly Sin" % of total population	RISES BY	.23 %	from	35.7%	to	35.93%

Inmate subpopulation counts and percentages, for the past 48 months

Overview of inmate age statistics, Jan-2000 to Sep-2020

The "aging inmate population" is a concern in correctional systems throughout America, including Georgia. Here, the increase in inmate age is the result of several factors. Teenagers have been steered away from prison by increased usage of probation and other alternatives, at least for their first convictions. And there has been a surge of middle-aged male sex offenders due to the expanding "It's OK to tell" ethos. But most importantly, more severe sentence lengths and release policies have greatly increased the length of time that most offenders -- especially violent ones -- spend in prison, thereby increasing their average age.

Average age of active inmates	RISES BY	.06	from	40.1	to	40.16
Number in their teens	falls by	23	from	429	to	406
Percentage in their teens	falls by	.04%	from	.88%	to	0.84%
Number in their twenties	falls by	207	from	12,091	to	11,884
Percentage in their twenties	falls by	0.11%	from	24.78%	to	24.67%
Number in their thirties	falls by	98	from	14,873	to	14,775
Percentage in their thirties	RISES BY	0.19%	from	30.48%	to	30.67%
Number in their forties	falls by	64	from	10,770	to	10,706
Percentage in their forties	RISES BY	0.15%	from	22.07%	to	22.22%
Number in their fifties	falls by	42	from	6814	to	6,772
Percentage in their fifties	RISES BY	0.10%	from	13.96%	to	14.06%
Number age sixty and up	RISES BY	10	from	3824	to	3,834
Percentage age sixty and up	RISES BY	.12%	from	7.84%	to	7.96%

Monthly counts of inmates by age group, Jan-2000 to Sep-2020

Y-axis of Twenties/Thirties/Forties/Fifties runs from 0 to 21,000. Y-axis of Teens/Sixty+ runs from 0 to 3,000.

Monthly percentages of inmates by age group, Jan-2000 to Sep-2020

Y-axis of Twenties/Thirties/Forties/Fifties runs from 0% to 40%. Y-axis of Teens/Sixty+ runs from 0% to 8%

Inmate counts & percentages by age, for past 48 months

All housed offenders under GDC jurisdiction

March 20, 2009 through October 16, 2020

All in bed + probs in jail + backlog	fall by	234	from	49,770	to	49,536
Probationers in jail	28	at	28
Inmate jail backlog	RISES BY	167	from	1487	to	1,654
All in beds: inmate + Prob + parole	fall by	401	from	48,255	to	47,854
Total probationers in beds	fall by	79	from	1,314	to	1,235
Probation detention centers	fall by	24	from	476	to	452
Probation boot camps	fall by		from		to	
Probation RSAT	fall by	55	from	838	to	783
Parole revocation centers	fall by		from		to	
All in inmate beds: state + other	fall by	322	from	46,941	to	46,619
Other inmate facilities :	RISE BY	34	from	13,495	to	13,529
Inmate boot camps	0	at	0
Private prisons	fall by	27	from	6974	to	6,947
County prisons	fall by	20	from	4381	to	4,361
Transitional centers	RISE BY	81	from	2140	to	2,221
In state prisons only	fall by	356	from	33,446	to	33,090

Probationers in jail awaiting placement in facilities

March 20, 2009 through October 16, 2020

This graph shows, for each Friday since March 20 2009, the number of sentenced felony probationers who were waiting in jail for placement in facilities that GDC operates for housing probationers -- detention centers, probation residential substance abuse treatment (RSAT) centers, and probation boot camps. Counts include both those offenders sentenced directly from court, and those whose street probation was revoked.

Total probationers waiting in jail	level	at	28
... waiting for detention centers	level	at	18
... waiting for probation RSAT	level	at	8
... waiting for probation boot camps	level	at	2

The highest number of probationers waiting in jail was	994	on	05-MAR-10
... highest number waiting for detention centers was	859	on	05-MAR-10
... highest number waiting for probation RSAT was	592	on	10-JUL-15
... highest number waiting for probation boot camps was	70	on	18-SEP-09

State inmates in jail awaiting placement in facilities

March 20, 2009 through October 16, 2020

This graph shows, for each Friday since March 2009, the number of prisoners, probationers, and parolees in local jails who have been sentenced or revoked to state prison and whose documents have been received and verified by GDC. Most are almost immediately assigned to a diagnostic center, and are designated as in "admission processing". Of those a few hundred may be in the "transportation delayed" category because there is no room in the assigned diagnostic center, or because the inmate is being held for medical reasons, or for other court proceedings, or other reasons. Those remaining are "ready to be picked up".

Total state inmates waiting in jail	RISE BY	167	from	1487	to	1654
... not yet assigned to a diagnostic center	fall by	1	from	49	to	48
... total "in admission processing"	RISE BY	168	from	1438	to	1606
... with "transportation delayed"	level	at	220
... ready to be picked up	RISE BY	168	from	1218	to	1386

The highest number of state inmates waiting in jail was	5338	on	27-MAR-09
... highest number not asg to a diagnostic center was	2881	on	12-JUN-09
... highest number in admission processing was	4916	on	25-MAR-11
... highest number with transportation delayed was	645	on	14-JAN-11
... highest number ready to be pickup was	4435	on	25-MAR-11

Female state inmates in jail awaiting pickup

March 20, 2009 through October 16, 2020

This graph shows, for each Friday since March 2009, the number of female state prisoners in local jails who were assigned to diagnostic centers but had not yet been picked up.

Female state inmates in jails waiting picked up	RISE BY	20	from	92	to	112
The highest number of female inmates waiting in jail was		424	on	01-FEB-13		
The lowest number of female inmates waiting in jail was		17	on	20-MAR-20		

Summary of housed prisoners, parolees, and probationers

The composition of Georgia's jail population

Georgia's jails house about two-thirds as many inmates as Georgia's state facilities. There are 146 jails serving Georgia's 159 counties, ranging from Schley and Evans (less than 10 inmates each) up to Cobb, Fulton and Gwinnett (over 2,000 inmates each) and the biggest - DeKalb (over 3,000 inmates). Jailers issue monthly reports breaking their populations into four groups: (1) inmates awaiting trial, (2) inmates serving state sentences, (3) inmates serving county sentences, and (4) "other" inmates, including municipal cases, private probationers, illegal immigrants, inmates bound for the Federal system, and so on.

Inmates awaiting trial are the largest group - about 60% of the total. Growth in this group soared in the mid-1990's, when mandatory sentencing laws and severe Parole policies came into effect, motivating ever-larger numbers of jail inmates to risk going to trial rather than plea-bargain to the certainty of a long prison term. The other three groups - state, county, and "other" - are roughly the same size.

Total number of jail inmates	RISES BY	618	from	30541	to	31159
Capacity of jails (number of beds)	falls by	172	from	49145	to	48973
Jail utilization (inmates/beds)	RISES BY	1.5%	from	62.1%	to	63.6%

COUNT of inmates in local jails who are ...

... unsentenced, awaiting trial	RISES BY	429	from	20500	to	20929
... serving state sentences	RISES BY	362	from	1503	to	1865
... serving county sentences	falls by	313	from	4370	4370	4057
... in "other" category	RISES BY	140	from	4168	to	4308

PERCENTAGE of inmates in local jails who are ...

... unsentenced, awaiting trial	RISES BY	0.1%	from	67.1%	to	67.2%
... serving state sentences	RISES BY	1.1%	from	4.9%	to	6.0%
... serving county sentences	falls by	1.3%	from	14.3%	to	13.0%
... in "other" category	RISES BY	0.2%	from	13.6%	to	13.8%

Two versions of the "Jail Backlog" -- by GDC, and by the Jailers

Jailer's count of state inmates in county jails **RISE BY 362** **from 1503 to 1865**
GDC count of jail inmates waiting for prison **RISE BY 755** **from 1115 to 1870**

The graph above and the table below compare two widely circulated versions of the number of offenders in jail who are "state inmates," from 1993 to the present. The larger of the two counts, by the jailers, includes anybody who is serving any kind of state sentence who is in jail for any reason. The smaller count, GDC's, includes only those who have been committed to the state prison system and whose sentences or revocation orders have been received and certified by analysts in GDC's central office.

The two counts are different, but not discrepant. This is a matter of two governmental entities producing two different counts, each for its own legitimate purposes --- GDC to count the number of offenders queued up to enter the state prison system, and the jailers to tally their populations into broad categories. The table below shows why the jailers' count will always be larger.

Why the jailers' count is higher than GDC's		In jailers' count of state inmates	In GDC's Inmate Jail Backlog
Type of jail inmate			
Inmates sentenced to prison; sentence documents received and OK'd by GDC		YES	YES
Inmates sentenced to prison whose documents are still with the Clerk of Court		YES	no
Parolees whose revocation orders have been received and OK'd by GDC		YES	YES
Arrested parolees have not yet been revoked to prison		YES	no
Probationers whose revocation orders have been received and OK'd by GDC		YES	YES
Probationers sentenced to jail-plus-street-time split sentences!		YES	no
Probationers awaiting entry to GDC boot camps & detention centers		YES	no
Arrested probationers who have not yet been revoked		YES	no
